 (State whether it is complex or compound sentence)

①

Indian Institute of Management Bangalore (IIMB) beat IIM Ahmedabad in the ranking of top management institutes in the country, according to a report unveiled Monday by Union HRD Minister Smriti Irani.

The 'India Ranking Report 2016' of the country's government and private institution was prepared according to the National Institutional Ranking Framework (NIRF), an entity launched by the ministry in September last year for six categories — engineering, management, pharmacy, architecture, universities and colleges. The framework has outlined a methodology to identify the broad parameters for ranking institutions under "teaching, learning and resources (TLR)", "research and professional practices (RPC)", "graduation outcomes (GO)", "outreach and inclusivity" (OI) and "perception". Incidentally, under TLR, IIMB scored 96.18, while IIMA scored 90.20. Under RPC, IIMB scored 94.05 while IIMA got 91.35. In terms of GO, IIMB was 90.10 and IIMA scored 89.73, while in OI, IIMB got 86.61 and IIMA secured 80.63. In perception, IIMA's score was 99, while IIMB trailed at 95. The Institute Of Management, Nirma University, ranked 29th and Entrepreneurship Development Institute-Ahmedabad ranked 45 among top 50 national management institutions. Indian Institute Of Technology, Gandhinagar was ranked 8th among the top 10 engineering institutions, led by IIT Madras. Others from Gujarat included Surat-based Sardar Vallabhbhai National Institute Of Technology (15th), and Institute Of Technology, Nirma University (45th). While no university from Gujarat made it to the top 10 list, Pandit Deendayal Petroleum University and Central University of Gujarat were at rank 55 and 60, respectively. Gujarat University was ranked 73, followed by Maharaja Sayajirao University at 76th rank.

- i. Who unveiled the "India Ranking Report 2016"?
- ii. Which are the two management institutions from Gujarat in the top 50 institutes?
- iii. What is the rank of Gujarat University?
- iv. How many universities from Gujarat are in top 10?
- v. Give a suitable title to the passage?

Or

B. Make a précis of the following passage:

15

As we grow older, our interests, priorities and eating habits change and so does our nutritional needs. We go through major changes in our lifestyle however, the core principles remain the same- to meet our daily nutritional needs. Here we talk about nutrition and ideal food habits for people in their 20s. In India, early 20s is mostly about struggling to get the first job, networking, handling love problems, getting married and for some, even starting a family. With so much going around in life, healthy eating often takes a back seat. Researches have shown that high percentage of women in this age group fail to meet their recommended daily nutrition requirements- which mainly include proteins, calcium, iron and folic acid. The recommended daily amount for protein is 50-60g and 28g for fibre, yet on an average, adults consume only 35-45g and 12-15g respectively. It is important to know that low protein, low fibre, high sugar and high salt diets can contribute to several deficiencies like low haemoglobin, dizziness, disturbed sleep, digestive problems such as constipation and increased risk of diverticular disease and high blood pressure later in life. Also, it is advised that especially women should focus on their health and dietary habits so that they have healthy and complication free pregnancy.
