## No. of Printed Pages: 02 SARDAR PATEL UNIVERSITY

M.Sc. Semester IV [Electronics & Communication] **PS04CELC01: Mobile Communication** 

## 21<sup>st</sup> April 2015 Tuesday

10:30 AM to 1:30 PM

Total Marks: 70

[08]

Note: Figures to the right indicate maximum marks.

Q	1	Choose the correct Answer.		[08]
	1.	is the central coordinating element for all cell sites and contains		
		cellular processor and cellular switch.		
		a) Mobile units	b) MTSO	
		c) Base station	d) None of them	
	2.	D = R for K = 7.		
		a) 3.46	b) 4.6	
		c) 6	d) 7.55	
	3.	Co-channel interference reduction factor is given by		
		a) D×R	b) D/R	
		c) R/D	d) None of them	
	4.	$\eta_c =$ during busy hours.		
	••	a) 0.4	b) 0.5	
		c) 0.6	d) 0.8	
	5.	The foliage loss along the radio path at 80	0 MHz is	
	Э.	a) 40 dB/dec	b) 50 dB/dec	
		c) 60 dB/dec	d) 80 dB/dec	
	6.	The 1-mi intercept level in a suburban are	a is	
	0.	a) -61.7 dBm	b) 61.7 dBm	
		c) -6.17 dBm	d) 6.17 dBm	
	7.	The stores the data of mobile		
	1.	a) EIR	c) AUC	
		c) STP	d) VLR	
	8.	the functions as the paging ch	annel for responding to the mobile	
	ð.	The functions as the paging channel for responding to the mobile originating calls.		
		a) forward set-up channel	b) reverse set-up channel	
		c) access channel	d) None of them	
		c) access channel	.,	
Q	2	Answer in short (Any seven):		[14]
	1.	What are the limitations of conventional	mobile telephone system?	
	2.			
	3.	,		
	4.	What is cross-talk?		
	5.			
	6.	Why there is constant deviation along path? Explain near-in distance propagation.		•
	7.			
	8.			
	9.	-		
		· · · · · · · · ·		

50

www.gujaratstudy.com

3	(a) Explain basic cellular system in detail.	[06]
	(b) Discuss the performance criteria of cellular system.	[06]
	OR	
	(b) What is cell splitting? Also discuss different techniques of cell splitting.	[06]
4	(a) Explain the term "adjacent channel interference". How it can be reduced?	[06]
	(b) Design a directional antenna system in K=7 and K=4 cell pattern and compare them	[06]
	OR	
	(b) Discuss the designing of an omnidirectional antenna system in the worst case.	[06]
5	<ul> <li>(a) What is foliage loss? Discuss the different parameters on which it depends?</li> <li>(b) Discuss lee's point-to-model.</li> </ul>	[06] [06]
	OR	• •
	(b) Discuss various methods for improving the coverage & capacity in cellular system	[06]
6	(a) Write a short note on GSM archite <b>ct</b> ure.	[06]
	(b) What is frequency management and channel assignment? Explain in detail. OR	[06]
	(b) Explain the function of : Setup channel, access channel, paging channel.	[06]
	4	<ul> <li>(b) Discuss the performance criteria of cellular system. OR</li> <li>(b) What is cell splitting? Also discuss different techniques of cell splitting.</li> <li>4 (a) Explain the term "adjacent channel interference". How it can be reduced?</li> <li>(b) Design a directional antenna system in K=7 and K=4 cell pattern and compare them OR</li> <li>(b) Discuss the designing of an omnidirectional antenna system in the worst case.</li> <li>5 (a) What is foliage loss? Discuss the different parameters on which it depends?</li> <li>(b) Discuss lee's point-to-model. OR</li> <li>(b) Discuss various methods for improving the coverage &amp; capacity in cellular system</li> <li>6 (a) Write a short note on GSM architecture.</li> <li>(b) What is frequency management and channel assignment? Explain in detail. OR</li> </ul>
